"As the COVID-19 pandemic has been properly controlled and contained in China, our adult and K-12 learning centers have been re-opened gradually and resumed in-class lessons since June 2020. Despite our net revenues dropping by 5.8% to RMB620.8 million in the third quarter of this year, from RMB659.2 million in the same period of last year, our overall operating loss decreased from a loss of RMB119.4 million in the third quarter of 2019 to a loss of RMB56.6 million in the same period of 2020. These were attributable to the stringent costs and expenses control measures which we have been implementing since the beginning of this year. The net loss in the third quarter of 2020 was RMB63.9 million, as compared to the net loss of RMB110.0 million in the same period of 2019. In the third quarter of this year, we were

grateful and excited to see an encouraging growth in our K-12 education business. Compared to the figures in the third quarter of last year, our K-12 education business achieved 146.0% increase in net revenues and 62.0% increase in student enrollments in the third quarter of 2020. The gross margin of K-12 education was 39.3% in the third quarter of this year, compared to the gross margin of -4.1% in the same period of last year." remarked Mr. Yongji Sun, the CEO of Tarena.

"Looking ahead, our strategies are two-folded. Firstly, we will continue to uplift efficiency of our operation to improve our margins. Secondly, in order to strengthen our market leading position and expand our market share, we will focus on further streamlining our product lines, optimizing online and offline programs and curriculums, and further improving our tutoring qualities and user experience." concluded Mr. Sun.

"Our cash and cash equivalents and time deposits, including current and non-current, and restricted cash, decreased by 39.7%, from RMB621.2 million as of December 31, 2019 to RMB374.7 million (US\$55.0 million) as of September 30, 2020. The decrease in cash and cash equivalents and time deposits, including current and non-current, and restricted cash was mainly due to net cash used in operating activities which mainly are composed of net loss of RMB676.5 million incurred in the first nine months of 2020, and was partially offset by the increase in total deferred revenue of RMB377.4 million. Net cash outflow from operating activities in the third quarter of 2020 was RMB11.7 million (US\$1.7 million), whilst net cash outflow from operating activities in the first half of 2020 was RMB183.6 million." said Wing Kee Lau, the CFO of Tarena.

About Non-GAAP Financial Measures

Beginning in the second quarter of 2016, the Company revised its non-GAAP financial measures to exclude gain or loss on derivative instruments, goodwill impairment, impairment of intangibles via acquisitions of businesses and the related tax impact, in addition to its historical practice of excluding share-based compensation expenses for non-GAAP results.

To supplement Tarena's consolidated financial results presented in accordance with United States Generally Accepted Accounting Principles ("GAAP"), Tarena's management uses non-GAAP measures of cost of revenues, operating expenses, operating income, net income, and basic and diluted net income per ADS, which are adjusted from results based on GAAP to exclude the share-based compensation expenses, gain or loss on derivative instruments, goodwill impairment, impairment of intangibles via acquisitions of businesses and the related tax impact. These non-GAAP financial measures should be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for, or superior to, GAAP results. In addition, calculation of the non-GAAP financial measures may be different from the calculation used by other companies, and therefore comparability may be limited.

Tarena's management believes that excluding the share-based compensation expenses, gain or loss on derivative instruments, goodwill impairment, impairment of intangibles via acquisitions of businesses and the related tax impact provides meaningful supplemental information regarding our performance and liquidity by excluding certain items identified as non-recurring and infrequent in nature, and non-cash charges. The amount of share-based compensation expenses, gain or loss on derivative instruments, goodwill impairment, impairment of intangibles via acquisitions of businesses and the related tax impact are not built into the Company's annual budgets and quarterly forecasts, which generally will be the basis for information Tarena provides to analysts and investors as guidance for future operating performance.

The non-GAAP financial measures are provided to enhance investors' overall understanding of Tarena's current financial performance and prospects for the future. A limitation of using non-GAAP cost of revenues, operating expenses, operating income (loss) and net income (loss), excluding the share-based compensation expenses, gain or loss on derivative instruments, goodwill impairment, impairment of intangibles via acquisitions of businesses and the related tax impact is that the share-based compensation charge has been and will continue to be a recurring expense in the Company's business for the foreseeable future, and gain or loss on derivative instruments, goodwill impairment, impairment of intangibles via acquisitions of businesses and the related tax impact may recur in the future. In order to mitigate these limitations the Company has provided specific information regarding the GAAP amounts excluded from each non-GAAP measure. The accompanying tables include details on the reconciliation between GAAP financial measures that are most directly comparable to the non-GAAP financial measures the Company has presented.
